

Centers for Medicare and Medicaid Services Announces Patient-Driven Payment Model (PDPM) for Skilled Nursing Facilities¹

EFFECTIVE DATE: JANUARY 1, 2020

On July 31, 2018, CMS finalized the PDPM for Skilled Nursing Facilities. The new PDPM model will do the following:

- ✓ Improves payment accuracy
- ✓ Focuses on the patient, rather than the volume of services provided
- ✓ Significantly reduces administrative burden on providers
- ✓ Improves SNF payments to currently underserved beneficiaries

Patient-Driven Payment Model

How does it work?¹

Under the PDPM, there are **FIVE** case-mix adjusted components, all based on data driven patient characteristics:

1. Physical Therapy (PT)
2. Occupation Therapy (OT)
3. Speech Language Pathology (SLP)
4. Nursing
5. Non-Therapy Ancillary (NTA)
6. Non-Case Mix

How can SNF's prepare?²

- Continue to educating staff on PDPM
- Provide ICD-10-CM staff training
- Identify hospital documentation that supports diagnoses (this will allow your staff to code to the highest specificity)
- Educate facility provider on documentation
- Provide Annual each October 1st on the revised set of ICD-10-CM codes
- MDS accuracy

Mölnlycke can help.

- ✓ Comprehensive **pressure injury prevention** program to help you reduce pressure ulcers
- ✓ **Clinical Directors and online resources** to support:
 - Educating your staff on pressure injury prevention
 - Develop your pressure injury prevention programs
 - Create and promote customized tools to promote compliance with your pressure injury prevention programs
- ✓ The only pressure injury prevention dressing demonstrated in 5 RCTs, with up to 88% reduction in pressure injury incidence
- ✓ Team of Clinical Directors who are equipped to help customers validate patient outcomes, reduce treatment costs, and improve quality at the facility level
